Local Criteria

iSWM™ Design Manual for Site Development

Chapter 1 – Storm Water Management System Planning and Design

- 1.1 Storm Water Site Planning
- 1.2 *integrated* Planning and Design Approach
- 1.3 *integrated* Site Design Practices
- 1.4 *integrated* Storm Water Controls

Chapter 2 – Hydrologic Analysis

- 2.1 Estimating Runoff

Chapter 3 – Hydraulic Design of Streets and Closed Conduits

- 3.1 Storm Water Street and Closed Conduit Design Overview
- 3.2 On-Site Flood Control System Design

Chapter 4 – Hydraulic Design of Open Channels, Culverts, Bridges, and Detention Structures

- 4.1 Storm Water Open Channels, Culverts, Bridges, and Detention Structure Design Overview
- 4.2 Culvert Design
- 4.3 Bridge Design
- 4.4 Open Channel Design
- 4.5 Storage Design
- 4.6 Outlet Structures
- 4.7 Energy Dissipation

Chapter 5 – Storm Water Controls

- 5.1 Storm Water Controls Overview
- 5.2 Storm Water Controls

Appendices

- Appendix A Rainfall Tables for North Central Texas
- Appendix B Hydrologic Soils Data
- Appendix C Federal, State and Regional Initiatives
- Appendix D Storm Water Control Design Examples
- Appendix E iSWM Worksheets and Checklists
- Appendix F Landscaping and Aesthetics Guidance
- Appendix G Storm Water Computer Models and Information Tools
- Appendix H Dams and Reservoirs in Texas
- Appendix I Miscellaneous Information (Reserved for Local Use)
